## MRS. PANKHURST TO **TRGE NEW ALLIANCE**

British Feminist Here to Preach Triple Federation to Guarantee Peace.

A.S. FRANKLIN RETURNS

Advocates Development of Shipping Policy to Retain Present Maritime Grip.

advocating an open alliance of Great tain, France and the United States to ntee the peace of the world, Mra ine Pankhurst arrived yesterday on White Star line steamship Adriatio begin a tour of the United States and

estes should form an alliance immedistely for the preservation of the world's that is the greatest international chiem now to be accomplished," Mrs. wakhurst saaid. "These three strongest nations have the power to enforce sace and this alliance should be made pealy and regardless of the opinion of my other country. The three nations are

company and regardless of the opinion of any other country. The three nations are democratic and are actuated by similar policies and a similar spirit of fairness, and for this reason are able to put into effect the only real guarantee of world pace.

"In some ways Great Britain is more democratic than the United States. I have seen the pleas of men in rags feaght for in the British Parliament by members of that body because the poor min was a constituent and had a vote. Also in Britain we have the franchise for women, which is not yet the case in all the States here.

Wemen to End Bolshevism.

We women are going to put an end a Bolshevism by applying the same spirit that prompted the women to turn est munitions and stand behind their man during the war. The same spirit was moves the women of America. I found that out last year when lecturing to the women smallton workers in Pennsylvania, and is England. The great work confronting women now is the suppression of Bolshevism and this is the principal reason for my tour at this time."

P. A. S. Franklin, president of the immenational Mercantile Marine Company, who was also a passenger on the

International Mercantile Marine Company, who was also a passenger on the Adriatic, said he had visited Southamp ton, Liverpoch, London, Glasgow, Antwerp, Brussels and Paris, conferring with slipping men and gathering at first hand information about wharfage and docking facilities and either shipping matters.

'I found that Belgium is recovering at a surprising rate of speed," he said. "Conditions everywhere are good so far as my company is concerned, and we are going ahead with our plans for dewildpend. Just now the United States is the leading maritime nation of the world. This condition is due of course to war causes, but it means that America is confronted now with a wonderful to poor internative for the most of. Our own company is in a grational Mercantile Marine Commost of. Our own company is in a strong position, and we plan to branch out in every possible direction. The United States ought to assist in every possible way the shipping interests which stand ready to keep this country a great maritime nation. What is needed is a strong conservative policy. Proper attention also should be given to get a better halanced fleet of American vessels high class and intermediate class hassenger ships as well as cargo carriers.

CATHOLIC PRELATES TO MEET.

Plans to Be Made for After War Work.

All the Roman Catholic archbishops and bishops of America will meet, for the first time, in convention at the Catholic University, Washington, September 24, to mobilize the forces of the church, under the leadership of Cardinal fiers.

London Police Are Replaced.

Col. William E. Wood, head of the New York Police Reserves, returned from a vacation spent in inspecting the London police force, including the new sviation branch. He said the London police strike was a temporary affair and ras won by the firm attitude of the Government. The police, he said, soon aw their mistake and begged to be relatated, but the authorities would not lack down and have filled the vacancies with a new set of men of an exceptional type. He added that the strike had tree. He added that the strike had proved a serious lesson in Great Britain and would not be repeated.

Sir Arthur Shirley Benn, K. B. E., M. P., arrived to attend the Atlantic City conference of chambers of com-merce of the United States as a delegate of similar organizations throughout Great Eritain. f similar organizations throughout heat Britain, George Granville, Duke of Sutherland,

George Granville. Duke of Sutherland, the largest landholder in Scotland, also strived accompanied by the Duchess of Stherland. They are on their way to rait western Canada, where the Duke is the a large landholder, his properties agreements must be a million acres. The plan of populating open country by settling small ranchers under agreements such as are usual between large landholders and tenants is a failure." the Duke said. "But doing practically the same thing through Government action and supervision, as provided in the plans of the United States and British Governments in settling returned soldiers, is a success. The democratic idea where the land is offered by the Government and the ranch taker is regarded principally as a citizen is the element that pally as a citizen is the element that works for the success of the Govern-tent plan, I believe."

Michael J. Dowling, president of the

Minesota Bankers Association, who lost both legs, an arm and the fingers of his other hand in an accident several years as, returned from delivering a series of lectures to disabled British soldiers. "The United States is far ahead of Great Britain in the work of caring for dimbled soldiers," he said. "I found
